PROFESSIONAL SUMMARY

Computer Science graduate and current Computer Science student with hands-on experience building full-stack and frontend applications, educational platforms, college-management tools, and student-facing navigation solutions. Independently developed the Madar educational platform and contributed to the frontend of fashion e-commerce and flight-booking applications. Technical volunteer supporting digital solutions for a college, including a task and community management platform and an operational 3D campus map with lecture-based navigation. Interested in building practical, user-focused software products.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C++, Java, SQL (PL/pgSQL), Shell scripting
Frontend: React, HTML, CSS, Vite
Backend: Node.js, Express.js
Databases: MongoDB, PostgreSQL (Neon)
DevOps and Tools: Docker, GitHub
UI/UX: Wireframing, prototyping, user-centered design
Additional: Software development fundamentals, problem solving, leadership, communication, teamwork, critical thinking, advocacy

PROJECTS AND TECHNICAL VOLUNTEERING

Madar Educational Platform

- Independently developed an educational platform.
- Incorporated AI-related functionality based on concepts learned while studying artificial intelligence.

College Task and Community Management Platform (CTPM) | Technical Volunteer

- Built a platform for managing tasks and supporting the college community; currently in use at the college.
- Implemented automation for sending messages through WhatsApp.
- Technologies: TypeScript, JavaScript, PostgreSQL (PL/pgSQL), Shell, Docker, HTML, CSS.

3D Campus Map and Student Navigation | Technical Volunteer

- Created an operational 3D map to help new students navigate the college.
- Integrated lecture schedules so students can select a lecture and receive directional guidance (for example, turn left or right).
- Technologies: JavaScript, Python, CSS.

Student Portfolio Hub

- Built a hub where students compete in each subject and see their ranking on a leaderboard.
- Automated integration between the platform and WhatsApp: when a student subscribes to a teacher, the student is added directly to that teacher's WhatsApp group.

College Learning Support System | Technical Volunteer (in development)

- Currently developing a college system intended to add features that make university learning easier.

Confit Fashion E-commerce Application

- Contributed to the frontend of a fashion e-commerce application.

Flight Booking Application

- Contributed to the frontend of a flight-booking application.

EDUCATION

University of the People (online)
Bachelor of Science in Computer Science | October 2022 - September 2026 | CGPA: 3.65
Graduated September 2026

East Port Said National University
Faculty of Computer Science | September 2024 - Present | GPA: 3.35
Third-year student

TRAINING AND CERTIFICATIONS

- Full-Stack Development with MEAN Stack Training, NTI (2026)
- Web Development with React.js Training, ITI (2026)
- UI/UX Design Certification, NTI Scholarship (2026)
- Python Level 1 Certification, ITI (2026)
- Advanced C++ Training (45 hours), MCIT Training Grant
- Next Generation Tech Booster Program, Udacity scholarship program (2023)
- Africa Matters Youth Advocacy Program, Graduate

SCHOLARSHIPS AND ACHIEVEMENTS

- University of the People Computer Science Scholarship (2022 - 2026)
- DECI Scholarship Recipient (2023)
- Rise Challenge Finalist (2023), recognized for leadership, innovation, and problem solving
- Egyptian Beaver Competition (2023), score: 370/400

LANGUAGES

Arabic: Native | **English:** Professional proficiency
